Medford, MA 02155

**What:** Modern Hardware & Benjamin Moore will be hosting a demonstration to showcase recommendations, features, benefits, application tips & techniques for ARBORCOAT™. *Refreshments will be served!*

## About ARBORCOAT:

Benjamin Moore's ARBORCOAT stains repel damaging UV rays and prevent unseemly scuffing and the wear of high-traffic areas. They are water repellent, mildew resistant, and even after tinting, they are low VOC. There are five finishes available; Transparent and Semi Transparent are ideal for allowing the natural color and texture of the wood to show through, while still offering exceptional protection. The Protective Clear Coating must be used over these, and it is recommended that it be applied annually; It can also be used on its own.

For those wanting to completely mask the wood grain but retain the texture, there is a choice between the Semi Solid or Solid finishes, available in 75 popular colors.
